DS Risk Management Limited has been trading since February 2015 and is run by **David Shorrocks** who is a former Principal Inspector of Health and Safety at the Health and Safety Executive.

The company offers regulatory insight into what compliance with UK health and safety law looks like from the perspective of an ex-Inspector. Independent investigation, training, expert witness, audit and assurance are also core services.

ISSUE 1, APRIL 2015

- Snapshot Inspection / Audit
- Independent Investigation
- Bespoke Training
- Sensible, Proportionate Advice
- Expert witness service
- Consultancy tailored for you
- Legal Case Working
- Regulatory Insight

No long contracts – Pay as You Go Health and Safety!

As an ex-Inspector I have seen a vast number of health and safety management systems provided to businesses that are generic, don't reflect the risks that exist within the organisation and manifest themselves as volumes of unused files and folders gathering dust in the MD's office. More importantly they have and continue to cost a small fortune and add no value.

DS Risk Management Ltd will not tie you into expensive contracts ad infinitum. The process is simple. I will visit your organisation and carry out an assessment of compliance and identify any gaps. We will agree how and what resource is required to address any issues raised but more importantly agree the price and the timescales for action.

Quantity is by no means a sign of quality

Ask yourself a question. When did I last look at my health and safety management files?

If the answer is “I can’t remember” or “I’m not sure where they are” or “there’s so many I don’t where to look” then you have probably wasted a huge amount of money on documents to support your processes that probably don’t reflect what the actual risks are within your business.

Risk assessments, safe systems of work, relevant guidance and other documentation should support, inform and instruct your employees but managing the risks that exist must be the primary focus not ensuring the paperwork is up to date.

The most important questions you should be asking are “Are the risks on my site being properly managed?” “Are my controls appropriate to the level of risk that exists?”

Many organisations waste huge amounts of money over-interpreting the law because they don’t know what compliance actually looks like or what HSE requires.

My company can assess compliance through the eyes of an ex-Inspector with 13 years experience of doing just that. Get in touch, I might just save you a fortune.

Proportionate, sensible advice, relevant to your business to ensure adequate and appropriate management of the real risks that your employees and others are exposed to, in order to comply with the law

Will HSE be paying you a visit this year?

Are you in a sector being prioritised by HSE? Give me a call

HSE is committed to carrying out 20,000 proactive inspections per year in industries that intelligence suggests are high risk or priority sectors.

If during an inspection you are found in material breach of the law HSE will charge for the entire visit at a rate of **£124 per hour**. A chargeable intervention costs a company on average £953, an investigation into an incident would be much higher.

If you operate in the waste sector, in an industry where health risks are high such as food, wood, stonemasonry, fabricated metals and foundries get in touch. There are others. If you want assurance that you are compliant I can provide a snapshot assessment and prevent a hefty bill should HSE find you in breach. Call 07866 263449
